

MISSION BASED LEARNING

NEWSLETTER 2

October 2020

As a result of Covid -19 pandemic and the shift to online teaching in most schools in Europe, the project activities continue in online spaces. The missions which originally were planned as offline, face to face activities had to be re-imagined as online tasks. Despite the difficulties, the project partners met online on Zoom on 22 and 23 October 2020, chaired by Institute Vilafant, Spain, to discuss the progress, discuss future tasks and choose the project logo.

One important outcome of the meeting was the logo competition result. All student teams put forward their logo proposals. Big 'thank you!' and congratulations to all students who sent their logo designs.

The final voting was held online on Mentimeter. Each country had one vote and as a result, the project community chose the design proposed by students from Pasvalio Levens school in Lithuania. Congratulations! From now on this the official project logo

During the busy two day meeting students learnt to use a free video editing to shoot and share videos documenting their learning. On the second day of the virtual mobility students shared their videos and commented on their contents.

As a respond to their inability to hold physical mobility University of Gloucestershire suggested that students discuss their mission ideas online in local and then in international groups. Working with '2 / 4/ 8' idea encourages the young people to talk across partners in different countries and help them develop their missions. This idea means that two local partners will get together online with another pair in a different country to disc their missions. Then the four will meet another group of four students to further discuss their mission ideas. Ultimately, the feedback will help each national team to improve their missions.
